Projects

Project: Auditing Dashboards

Role: UI Developer

Team: 8 Members

I have been a part of developing the next-generation analytics and automation platform to provide the actionable and agile management of every component of the supply chain.

Roles and Responsibilities:

- Developed audit dashboards using HTML5, CSS3, JavaScript.
- Involved in the software development life cycle (AGILE) including Daily Scrum
- Meetings, Sprint Planning and implementations, and Development.
- Cross-checking with UX while implementing UI.
- Modern software engineering continuous integration environment (Jira, Confluence)

Project: Optimization Services

Role: UI Developer

Team: 6 Members

I am part of the optimization process that includes providing customized reports to meet the needs and specifications within time and budget constraints for the client.

Roles and Responsibilities:

- Developed customized reports UI and invoice search engine using HTML5, CSS3, JavaScript.
- Analyzed the data and providing optimization analysis reports for client's benefits.
- Cross-checking with UX while implementing UI.

Personal Practices

I used to explore and implement few basic ideas which keep me motivated to learn and enhance my skills gradually.
